

Protecting Your Property

Recording the details of your household items and contents can increase your chances of having them returned to you if they are stolen.

You can use the *Marking + Recording Your Valuables Form* in this kit to record your items. The form can also be downloaded via the QR code below, as a digitally editable PDF, a Google Sheet or an Excel spreadsheet, so that you can fill in and maintain an electronic copy.

You can also protect your property by:

- Engraving tools and bicycles with your Driver's License number.
- Taking photos of any unique items, such as jewellery and art works, and saving these to your files as well.
